```

Please choose from the following options:

- 0. Exit program.
- 1. Construct Database with default storage strategy.
- 2. Construct Database with selected storage strategy.

Number of selection: 1

Constructed database instance with default storage strategy (RelationalDB).

Please choose from the following options:

- 0. Exit program.
- 1. Write to database
- 2. Change database storage strategy.

Number of selection: 1

Please provide an Integer key: 347

Please provide the String to be written: Some test data.

Stored String value 'Some test data.' with Integer key '347' in RelationalDB

Please choose from the following options:

- 0. Exit program.
- 1. Write to database
- 2. Change database storage strategy.

Number of selection: 2

Please select a Database storage strategy:

- 0. Exit program.
- 1. Relational
- 2. NoSQL
- 3. Graph

Number of selection: 3

Updated storage strategy from RelationalDB to GraphDB

Please choose from the following options:

- 0. Exit program.
- 1. Write to database
- 2. Change database storage strategy.

Number of selection: 1

Please provide an Integer key: 6

Please provide the String to be written: Some more data.

Stored String value 'Some more data.' with Integer key '6' in GraphDB

Please choose from the following options:

- 0. Exit program.
- 1. Write to database
- 2. Change database storage strategy.

Number of selection: 0

Exiting.
